

Flypaper 2025

Official Newsletter of
The Flying Electrons of Menomonee Falls

Celebrating 60-plus Years of Service to the Community & Counting!

President's Preflight

Welcome to the Rabbit Hole

I had the privilege to attend a pattern contest last month in Muncie at the AMA headquarters site. There were some exceptionally talented pilots at the event including international F3A contestants who will compete in the World Championships this year (also in Muncie).

By no means do I include myself in that group. Being the sole pilot in the Intermediate level, I was not worthy to carry the sandals of any of these contestants. But they were all very friendly and forthcoming in responding to my many questions. Like many activities we grew up doing, there is a dearth of young blood or even new blood entering the field so newcomers are always welcomed.

(See **PREFLIGHT** on page 3)

IMPORTANT NOTICE:

Please Stay Off The Roof!

Concerns were raised that members are taking it upon themselves to climb to the shelter roof to assist with maintenance. This is extremely dangerous and leaves the club at extreme risk if a fall should take place.

If an accident due to a fall would happen, it would likely result in serious injury or death. It's not worth the risk to you or the club.

The membership unanimously voted during the last club meeting to prohibit such actions with-

out the expressed consent of the board AND proper safety measures in place.

Please abide by this ruling. If anyone sees someone scaling the roof without authorization, please stop them and report it immediately to the board.

Thank you.

Carl Verbanac Turns 101 Years!

Carl Verbanac, one of our loved lifetime members will be celebrating 101 years this June.

If you recall, Carl, Korky and the Verbanac family has sponsored a picnic luncheon for members at the airfield as a way of marking the years.

All of the details have been worked and Carl has asked that members plan to join him and celebrate as he marks 101 years on this planet.

Mark your calendars for Saturday, June 14th at

12:00 noon at Tamarac Field to help Carl celebrate.

For the 101st time ...

... Happy birthday Carl!

(PREFLIGHT continued.)

F3A Champion Andrew Jesky won the F3A division at the Muncie event. He also judged my first round flight and offered some simple and extremely helpful critiques.

Among the many talented pilots are also some incredible builders and I enjoyed talking to them as well.

Several of these top-level contestants build their own planes and it is amazingly easy to get them talking about the techniques they use. A casual question about the finish scheme or material could easily lead to a 45-minute conversation on how the plane was prepped and painted. And these planes were all immaculate.

One notable conversation ventured into the ever-expanding universe of 3D printing. That was a particularly productive thread that started several separate yet

simultaneous mini-threads as one of the contestants was proud to announce he had just bought a 3D printer. That elicited a surprise sidebar comment from Forest Pilkenton: "Welcome to the rabbit hole."

Forest is a world-class F3A pilot himself but also a 3D printing savant. There is a world of talent and innovation in the RC community. When you combine that intelligence with the passion that RC fliers bring to the table, it is amazing how much we can learn from each other as we probe into the many rabbit holes that are out there to explore.

Tinfoil Hats Anyone?

Are Friday afternoon signal losses at Tamarack Field a thing? It happened to me and I know I'm not the first. Mine occurred at 3:15 last Friday. I was in the down-line following a stall turn. Having my coveted pattern plane lose the signal as it was hurtling straight down at terminal velocity was a sphincter-tightening experience which I care not to repeat.

The signal loss was only a second or two and I was able to recover. It shut down the motor, which makes sense, but it resulted in a dead-stick landing.

Everything is intact, except perhaps my unbridled innocence. I have been doing some research into possible remedies, precautionary hardware, etc., but absolute answers are difficult to find.

There are many possible causes and frankly, nobody can say exactly what these are. It is easy to conclude that the RF spectrum is getting dirtier. There is always more money you can spend and I can see that additional spending may be in my future. I did find a source for \$2.00 tinfoil hats on Amazon. Maybe I'll start there.

PM

2025 ANNUAL *Club Fun Fly*

One of the best pilot turnouts the club has seen for years was experienced at our recent Club Fun Fly.

More than 30 pilots attended and some brought their best stuff. The airspace was constantly a buzz with large 3D aircraft, scale electrics, and even a tridactyl.

Our concession experienced the best traffic in years racking up more than \$350.00 in food sales.

Special thanks goes out to Ed Malec and Ryan Beckly for coordinating the event. Also to James Beckley and his team for handling food preparation and sales.

It was our first event of the year and was one of the most successful Fun Fly in history.

TJ

One of the highlights of the event included a presentation of pilot certification to Jack Madlung, one of our club's newest members.

MEETING MINUTES

Meeting Date: June 6, 2025

Meeting called to order at: 7:00PM

Number of attendees: 15

New Members in Attendance: NONE

Promotions Last month: Jack Madlung to Pilot

Guests in Attendance: NONE

CLUB FINANCIALS:

- › No major expenses anticipated in the near future

MEMBERSHIP NUMBERS:

- › Current Member Count 116
- › Four new additional members anticipated

FLIGHT TRAINING

- › Still 11 students, a combination of members and non-members
- › Henry Reed has been assigned 2 students

OLD BUSINESS:

- › A couple yards of dirt fill have been added to the low spot at the field
- › Seed was spread today ahead of the rain drizzle by Doug Colton and Dave Wandrey
- › We'll need to spread a little more seed to fully cover the area

AUTOMATED EMERGENCY DEFIBRILLATOR

- › AED was installed on the shed wall
- › An AED refresher exercise was held during the Club Fun Fly but it was hard to hear due to all the flying aircraft
- › We may schedule another refresher during the Electric Event

EVENTS UPDATE

- › Steve Huelsbeck made an appeal for volunteers to support his Electric event on June 29th

- › Tom Jacobs and Ryan Beckley will work the pilot registration and raffle sales desk

- › Various contests will be held

CONCESSION

- › The concession did about \$350.00 in sales during the Club Fun Fly. This was the best sales day for the Club Fun Fly in history
- › James Beckley suggested that we raise the food prices this year for AirFest to help offset rising food costs and maintain a healthy donation to the Scouts
- › The membership agreed to raise prices to \$7.00/plate for the event only
- › James will send Tom Jacobs pricing for side items and Tom will get new menus printed

SPECIAL THANKS

- › A special thanks goes out to Doug Colton, Bruce McGee, Bob Goldstein, Jerry Schneeweiss, Ed Malec and others for assembling and installing the new bleacher stands. They look great!

NEW BUSINESS:

- › We will relocate the emergency medical supplies to the outside of the shed. It will be accessible to any member with a field key
- › Continued concerns were raised about the back gate not being locked. Tom Jacobs will contact the Village Administrator to see if a lock could be welded to the back gate
- › Paul McGuan mentions getting a signal hit at the east end of the field at about 3:00PM on Friday. He stated that Tom Kunath had experienced something similar but did not know if it was in the same area. Henry Reed suggested that the interference could be connected with solar flare activity which has been high over recent weeks.
- › Tom Johnson said that the AMA rules signage needs to be replaced at the field. Tom Jacobs will

look into it

› The rear gate remains unlocked. Tom Jacobs will contact the Village to see if a lock can be welded to the chain to keep it in place.

STAY OFF THE SHELTER ROOF!

› Concerns were raised that members are taking it upon themselves to climb to the shelter roof to assist with maintenance. This is extremely dangerous and leaves the club at extreme risk if a fall should take place.

› The membership unanimously voted to prohibit such actions without the expressed consent of the board and proper safety measures in place.

OPEN FORUM:

› Tom Kowalewski suggested that we charge a pilot fee at the next Club Fun Fly and use those funds to support a cash raffle during the event.

› Tom also suggested that we have a Friday pizza day at the field. Details to be later worked out

› James Beckley suggested that we update our apparel wear for the club. He will come back to the board with a proposal for shirts and caps.

CLOSING ANNOUNCEMENTS:

› Electric event to be held on June 29th

› Scale event to be held on July 13th

› Next club meeting July 13th

Meeting adjourned at 8:03PM

Respectfully submitted

Tom Jacobs, Vice President

CLUB MEETING

Show & Tell

Ed Malec presented his Value Hobby Sabre-35.

This aircraft is an old school 3D plane made of balsa and tinted red Monokote covering. Ed purchased it from a swap meet for \$39.00.

The instructions were reported to be terrible, and the assembly photos blurred beyond recognition, however, he was able to get it together. The plane is very "twitchy" in the air and NOT for beginners.

ALL ELECTRIC FUN FLY

Sunday, June 29th, 2025
9:00AM to 2:00PM

(AMA Membership
Required to Fly)

You'll Get a Charge Out of this Event!

Leave your "slimers" at
home and join us.

Food, prizes and fun! Pilot's
Raffle! Win Raffle Tickets!

(Pilot Registration/Landing Fee
\$5.00)

DIRECTIONS:

Tamarac Field is conveniently located for anyone living in the Milwaukee, Waukesha and Ozaukee county areas. Kohler Lane is just north of Silver Spring Drive (W) and Pilgrim Road (YY).

Take Shawn Circle to Kohler Lane and follow the signs to the water tower. Watch for the sign that says, "Flying Field" at the top of the hill.

Special Events:

Speed Contest for Prop & EDF
Mini Air Show with Scale, 3D, EDF,
Heli & Sport

NIGHT FLIGHT 2025

Bring your best and
your brightest and
take to the sky.

Plan to join us one again as we venture into darkness. For your comfort and convenience, this year, we plan to be proactive in combatting the night-time bugs.

Friday, August 22nd

The event starts at sundown and carries on as long as you'd like.

24th Annual Fall RC Swap & Fun Fly

SWAP and Fly all day for \$5.00!

Saturday, September 6th, 2025

(Rain date Sunday the 7th)

The Flying Electronics Flying Site

N61 W17000 Kohler Lane, Menomonee Falls, Wisconsin

Gates open at 8:00AM

Open to the Public!

Ample Parking, Food & Refreshments available on site

\$5.00 Landing/Swap Fee for Pilots or Sellers

Vendors also Welcome!

Swap from your vehicle, tailgate, table or blanket

Informal Auction TBD at 12:00 Noon.

Swap and open flying all day

(AMA membership required to fly)

Directions to the Airfield:

From Hwy. 41/45 take the Silver Spring Exit West to Pilgrim Rd. Take Pilgrim Rd. North to the first overpass. Turn right on Shawn Drive at the light before the overpass then left on Kohler Lane, follow Kohler Lane up the hill. Watch for Flying Field signs. At the big water tower turn right to the field access road. (behind Tom's Trailers).

From Pilgrim Rd. southbound, go over the Kohler Lane Bridge, turn left at the light onto Shawn lane and follow the directions above.

GPS Coordinates: N 43 deg 07.799'
W 88 deg 07.408'

FRANKENPLANE

Do you have old airplane parts and components laying around?

Celebrate the Halloween season by creating something diabolical and horrifying ...

... A FRANKENPLANE!

Combine those old wings, fuselages, stabilizers and other parts to create life at the field and win a cash prize! Best and most outrageous creation wins as voted for by participating pilots!

**Sunday, September 21st
(10AM to 2PM)**

FREE Refreshments & Snacks while supplies last.

ANYTHING GOES!

Gas, glow, electric, rubber band or
even nuclear power is fine ... well,
maybe
not nuclear.

Any type or configuration is accepted.
The crazier the better!

All monster planes must fly at least one
lap around the field and successfully
land to qualify for judging.

Note: The field will remain open to all fliers as this is NOT a formal event. Feel free to bring one of your favorite planes to fly ... it will be a good contrast to all the monster aircraft there!

Take the "Build & Fly" Challenge

When: September 21st 2025
Where: Flying Electrons Airfield
(10AM to 2PM)

General Description

Scheduled for September 24th, 2023, our "Build & Fly Challenge" competition will be hosted at the Flying Electrons Airfield. This event is a non-sanctioned event available to Flying Electron club members only at this time and the field will remain open to general member flying. This event was created to challenge our members to select a favorite or unique aircraft design and then engineer and build it from a list of approved materials. It will test member's cleverness, creativity, engineering skill and resourcefulness.

Aircraft Selection

Any aircraft design, plans, photos or drawings may be used as a reference for your build, however the design reference materials that are used to build the aircraft must be submitted with the finished aircraft at the event to be judged.

Accepted Building Materials

Any paper, foam or cardboard product substrate may be used for construction. These include foam core, corrugated, paper, poster board, cardboard tubing, etc. There are a few other materials permitted for use but they are limited to the following:

Metals - Nuts, bolts, screws and wire for pushrods and landing gear are acceptable.

Accepted Woods - Wood may be used for firewall, landing gear mounts and control horns only. Small diameter wood dowels (1/8" max) or bamboo skewers may also be used where desired.

Adhesives & Tapes - All types of adhesives and tapes are acceptable for use in construction.

Plastics - Plastic components must be acquired as recycled household items such as; plastic soda bottles, plastic cookie containers, etc. These components may be modified or heat formed for fit to your aircraft. Nylon bolts or screws may be used as well as purchased plastic spinners.

Other Allowed Purchased Components - All electronics, servos, motors, batteries, etc. Light weight wheels are also acceptable as a purchased item.

Building Guidelines

- All power sources must be electric.
- No limit on the number of motors.
- Safe procedures in the use and placement of lipo packs is required.
- No maximum or minimum aircraft size.
- Landing gear or wheels are not required.
- You may choose to decorate your aircraft or not, however one of the judging criteria will be appearance. You can finish your aircraft with any kind of paint, decals, adhesive films, etc.

Safety Test

- All aircraft must undergo an inspection before its maiden flight and be judged safe and airworthy to compete in the competition.

This event will be held in concert with our Franken-Plane event. Although both events will be held on the same day, they will be managed and judged separately.

Event Qualifications

- Only one aircraft entry per pilot is allowed.
- Aircraft must make one successful complete flight pass around the airfield.
- Pilots are allowed 3 attempts.

Awards

Since this is a new event without a clear indication of how many might participate, the top winner awards will be a surprise. So, winners will need to wait and see!

The Flying Electrons Now Accept Electronic Payment For Renewals Using Zelle

After many requests, we've setup an account using Zelle for the electronic payment of new memberships and renewals. The process is easy but still requires that you complete the club membership application and confirm your AMA membership and FAA Registrations by submitting a copy of each either electronically or via mail to our Secretary/Treasurer for verification.

The steps to pay electronically through Zelle are simple.

Most all banking institutions now offer Zelle as an electronic or mobile payment option. To get started using Zelle for membership renewals, do the following:

STEP 1 - Email Files You Will Need

1. Complete your renewal or new membership application using the PDF template located on the club website under the "JOIN" button
2. Save your application on your PC
3. Scan your FAA Registration and save it to your PC
4. New Members - scan your TrustID and save it to your PC
5. Scan your AMA card and

save to your PC

STEP 2 - Setting Up Zelle For Payment

1. Go online to your banking institution and look for the Zelle payment option
2. Click to create a Zelle payment account and follow the instructions to set up payments to the Flying Electrons

3. The account to use for payments to the Flying Electrons is **Mpolzin1234@gmail.com**
4. Once account set up is completed, refer to your membership application and note the

total due for renewal or new membership

5. Indicate that amount to be paid in Zelle (you can also choose what day the payment is to be sent)
6. Click send payment

STEP 3 - Send Your Application & Documents as Email Attachments

1. Send an email to Mark Polzin, club secretary/treasurer, indicating that you wish to renew or join using Zelle.
2. Attach your membership application, FAA registration, AMA membership card, and TrustID (if this is a new membership, TrustID only needs to be submitted once)
3. Click SEND Email
4. You will receive an email from your banking institution verifying your electronic payment

Your renewal or new membership is now complete.

This is our initial venture into electronic payment for new memberships and renewals. I know that it looks like a lot of steps but most of these are one-time steps that need to be taken.

But, if you're not ready to take

Enrollment Form for Membership
